Integrated Logistic Support

Aeromaritime Group provides communication systems supported by Integrated Logistics Support (ILS) in accordance with MIL-STD-1388-1A, Appendix B and S2000M.

Maintenance Planning	**Supply Support**	**Equipment & Testing Support**	**Workforce Support**	**Training & Training Equipment Support**
Technical Data	**Computer Resources Support**	**Packing, Handling, Storage & Transport**	**Facilities**	**Design Interfaces**

Aeromaritime Group focuses on maximizing the profitability and sustainability of our customers' capital goods while increasing system uptime and operational efficiency.
Minimising life cycle costs (LCC) is a core objective of Aeromaritime Group's ILS approach. The diagram below outlines the key cost elements considered throughout the system life cycle.

Life Cycle Costs (LCC)

Moreover, Aeromaritime Group offers a diversity of services and products within the ILS product and service portfolio:

- Renovation and modernization of IT infrastructures (hardware and software)
- COMMS acceptance testing
- Measurement and validation of radio output performance
- Inspection of wiring and connector integrity
- Operational training for new crews and retraining of existing personnel
- Maintenance training programs
- Retrofit and training for GMDSS equipment on existing systems
- Updates and upgrades of MMHS systems (STANAG 5066, STANAG 4406, etc.)
- Conversion to the latest generation of radio systems where feasible
- Analysis and optimization of spare parts inventories
- STTE inspection, refurbishment, and augmentation where applicable
- Consulting services in frequency management
- Advisory services for the use of MMHS
- NATO-catalogization of parts, assemblies and products affected by ILS according to S2000M
- Interactive spare part catalogues
